**Inventor:** Satan

**Year:** ~????

You can do easy for example create a ROT13 encryption, that of course can be broken in seconds, but to begin with crypto it's maybe a good exercise, then continue maybe with Vigenère cipher, and then p-boxes and s-boxes.

Be careful, if you begin with crypto eg your local military would like to own you and to prevent that you dont join the crypto-anarchy movement.

Work in pairs of at least 2 people, if they want to put you in mental institution to erase your brain you have better chances to prevent that.

i dont have a lot of time \*INSERT: since they target me permanently\* <- psychological warfare but if you have time it's quite easy to write something to encrypt and decrypt rot13, alphabet has 26 letters, so if you double-rot13 you have again the original.
